Implementing Nano Working Groups (INWG)

You may have attended workshops, webinars, community groups, and conferences pertaining to nanotechnology. You have a ton of great ideas to add to your curriculum, start a program, etc., but you either have no idea where to start or haven't had the time. NACK is offering a series of four Implementing Nano Working Group (INWG) sessions designed to help you cultivate your ideas or implement readily available, nanotechnology-based resources, facilitated by experienced nanotechnology educators from across the country. By the end of the sessions, you will have developed your personal plan for nano integration for your setting. Sessions will begin after March 15. Exact dates and times will be determined once groups are defined.

All participants are welcome, but only US high school and undergraduate institution educators will be considered for a series of performance-based stipends. Additionally, priority will be given to attendees of NACK Intro to Nano Workshops (or the equivalent). Further details will be available in January at cneu.psu.edu.
