

## **Intro to Nano for Educators Workshop**

Electronics, energy, construction, medicine, consumer products, and even fashion are all benefiting from innovations at the nanoscale. STEM education cannot ignore this integral avenue of research and career advancement. Discover activities and content you can use to create your NGSS-aligned lessons or workforce development programming.

Free, virtual workshop on six consecutive Fridays from January 28 – March 4, 2022, noon – 2:00 pm ET, via Zoom. Asynchronous option available.
