

NSF ATE Grant Funding and Mentoring Opportunities

Greg Kepner – MNTEC - gregkepner1@gmail.com

This presentation will focus on grant funding opportunities from the National Science Foundation Advanced Technological Education program. This presentation will include information about NSF-ATE resources available to support STEM technician program development, faculty professional development, career pathways, curriculum development, outreach activities and more. Attendees will learn about how NSF-ATE grant funding opportunities can help them with their technician programs as well as what activities qualify for NSF-ATE grant funding. Participants will learn about multiple categories of NSF-ATE grant funding in support of STEM technician education. The current NSF-ATE solicitation will be shared along with some helpful NSF-ATE resources including multiple free mentoring opportunities through Mentor-Connect, the Micro Nano Technology Education Center, and more. There will be interactive questions and answers allowed throughout this session. Anyone thinking about submitting a grant proposal to NSF-ATE or wishing to learn more about the NSF-ATE program and resources may potentially benefit from attending this session. Presenters are experienced Principal Investigators with over 30 years of combined experience in the NSF ATE program.
